Undergraduate

Summary

Motivated Computer Science (AI & ML) student with a CGPA of 8.84, currently developing problem-solving skills through Data Structures and Algorithms practice. Experienced in C/C++, Python, and Java with hands-on academic projects including a faculty LMS system. Seeking an opportunity to apply programming and analytical skills through a challenging internship.

Education

B. Tech – Computer Science and Engineering (AI & ML)

Vellore Institute of Technology, Chennai
Expected Graduation: 2028
CGPA: **8.84 / 10**

Technical Skills

Programming
C++, Python

Core Areas
Data Structures and Algorithms (currently practicing), Machine Learning , deep learning ,Currently working on NLP and RAG

Tool/Technologies
Git (basic), VS Code

Projects

On going Privacy-Preserving AI Agent for PII Detection, Anonymization and Secure RAG

- A privacy-aware AI agent that receives user documents or text, detects and classifies PII using a hybrid Regex + Transformer NER approach
- calculates privacy risk, selectively anonymizes sensitive information, stores and processes only the protected representation for RAG-based question answering, uses an LLM to generate responses

Faculty LMS

- Built a faculty LMS to manage course materials, academic resources, and content distribution
- Implemented functionalities for uploading, organizing, and accessing educational content.
- Designed backend logic for user management and system operations

Coding Practice

LeetCode

- Regularly solving Data Structures and Algorithms problem and Practicing topics like arrays, strings, Recursion
